Software Guide recommends Incredimail Converter 5.1.0.8 Incredimail Converter is an ultra-simplistic Windows application whose purpose is to create EML-formatted files from Incredimail messages, in order to view them in programs such as Mozilla Thunderbird. Easy setup and basic UI Installing the application is a fast and easy job that shouldn't impose any difficulties because it bundles only familiar options. As for the interface, Incredimail Converter opts for a regular window with a plain look that provides direct access to all available options. Configure conversion settings You can immediately dive into the configuration procedure by indicating the Incredimail database and attachment directory, as well as allow the tool to export all emails, including the ones that were deleted. The conversion operation starts with the click of a button, and Incredimail Converter takes into account all messages found in the specified folder. This task is over pretty fast, and you can immediately open the new EML files afterward. There are no other noteworthy options provided by this piece of software. Evaluation and conclusion We have not come across any unpleasant surprises in our tests as far as stability is concerned, since Incredimail Converter did not freeze, crash or pop up error dialogs. It leaves a small footprint on system performance, as it needs a low amount of CPU and memory to work properly. However, users should keep in mind that this app works only with older editions of Incredimail, namely version 4 and 5. It serves its purpose and can be used by anyone with ease. Incredimail Converter can be a bit confusing if you don't know what it's supposed to do. It was fairly difficult to set up for my particular needs, but that's not Incredimail Converter's fault. It did exactly what it was supposed to do, which was create EML files from Incredimail messages. Ease of use Functionality Product Quality Customer Support Value for money Pros The free trial is easy to use. I was able to create an EML file in 5 minutes. Cons Very limited options. If you have a newer version of Incredimail, you won't be able to convert your messages. Nice to see, Incredimail
